

“BEWARE THE IDES OF MARCH”
FUTURE OF (CYBER)SECURITY TESTING

Päivi Brunou
Security Engineering Lead, Nixu

CYBERSECURITY TESTING TODAY

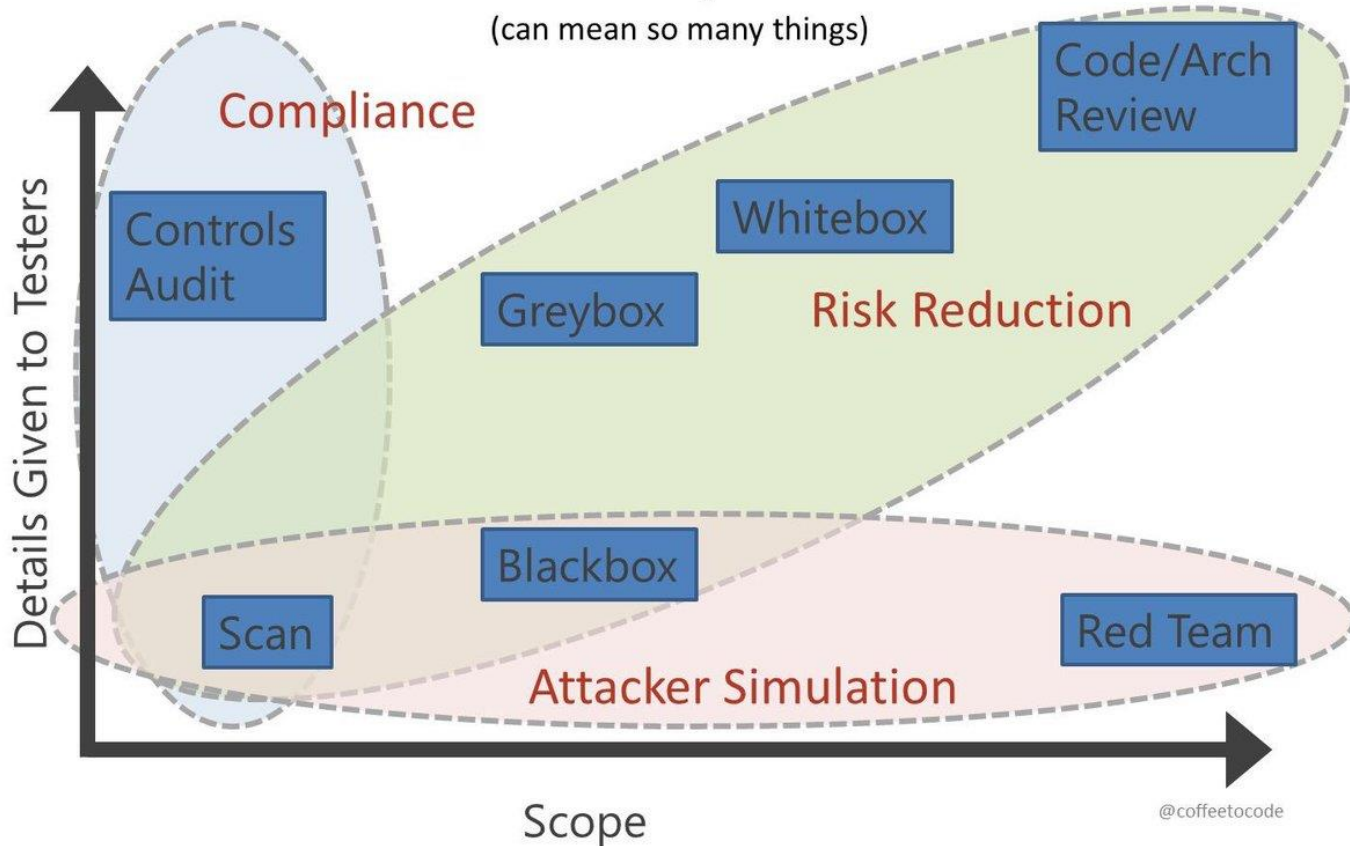

nixu

*LET'S TALK ABOUT
PENTESTING*

“I want a pentest”

(can mean so many things)

IS YOUR PENETRATION TESTING EFFECTIVE ?

nixu

DO YOU REQUEST PENTESTING....

1. When you actually need overview of every (missing) patch for all systems
2. When you actually need a review of systems security configuration settings
3. Right after a security incident ((before incident response and forensics)
4. Just prior going live.....

LONG LIVE THE PENTESTING....

1. Know what would keep you awake at night
2. Set clear objective(s) Data driven not technology based!
3. Set the scope (!)
4. Allow: Exploitation, alterations and exploring

nixu

cybersecurity.
